

Mainsail Handling System

StackPack + TidesTrack

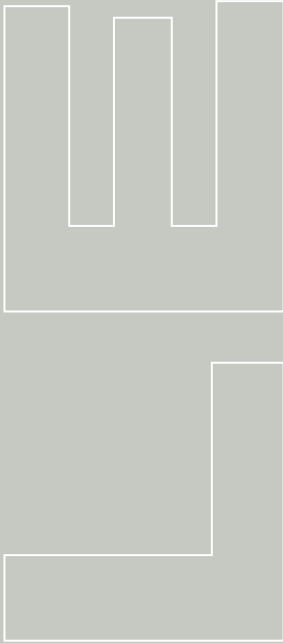

Without Doyle's StackPack mainsail furling system, lowering the main often goes like this: the sail is flogging itself into early retirement, you've got a half-dozen sail ties clamped between your teeth, the channel makes a jog to port but the helmsperson doesn't, and your five-year-old finally gets to find out if the boathook floats.

With TidesTrack, the main will drop the instant the halyard is released. The StackPack's integral sail cover allows the main to put itself away. In seconds, you're ready to zip it up, relax in the cockpit, and enjoy the show put on by the crews who don't have a StackPack or TidesTrack.

STACKPACK TIDESTRACK

Leading sailmaker Doyle Sailmakers and the innovative designers at TidesMarine have created a mainsail handling system which will make your sailing experience a breeze.

When used together, the Doyle StackPack and the TidesMarine Track System offer one of the best mainsail handling systems on the market. On monohulls up to 50 feet in length, this combination allows one sailor to operate the boat AND hoist the main. You no longer have to sacrifice sail shape and quality for convenience.

With TidesTrack, mainsail will rise easily and drop the instant the halyard is released.

TidesTrack system can be installed without going aloft.

StackPack and TidesTrack work with mizzens, staysails, club-footed headsails and high roach mains.

No sail ties or sail cover. StackPack opens automatically to accept the sail.

StackPack and TidesTrack:
An open and shut case for effortless furling.

StackPack FEATURES	StackPack BENEFITS
:: Integrated cover with secured zipper tail.	:: Enables quick and easy covering of sail without the need for sail ties.
:: Sunbrella cover.	:: Increases life of sail. Wide selection of colors. Customizable with logo or text.
:: Non-mechanical furling system.	:: No danger of mechanical failure or jamming.
:: StackPack neatly flakes the sail above the boom.	:: Improved visibility.
:: Reef lines pass through the sail cover.	:: Easy reefing with no need to tie sail to the boom.
:: StackPack cover attaches to the foot of the sail.	:: The cover and sail can be removed as one for winter storage
:: Brummel hooks are used to connect the lazy jacks.	:: Lazy jacks never need to be retied. Simplifies installation and removal.
:: Existing mains can be used as a base sail with the StackPack.	:: No need to replace your main to install a StackPack.
:: Easily raise, lower and cover sail when single-handed.	:: Use your main more. Get to your destination quicker.
TidesTrack FEATURES	TidesTrack BENEFITS
:: Machined to size from UHMW-PE.	:: Low friction, unaffected by saltwater, wear-resistant.
:: UV-stable material.	:: Long life in all climates.
:: Easy to install.	:: No going aloft.
:: Low maintenance.	:: No moving parts to lubricate or repair.
:: Seamless lengths to 65'.	:: No joints - slides won't catch or jam.
:: Compatibility.	:: Each piece of the track is custom built to fit internal flat or round luff grooves. Can be installed over existing external track or on composite / wood spars.
